Work Experience

PLAYGROUND CO., LTD

October 2021 to the present:

- PLAYGROUND is a startup in Vietnam specializing in software outsourcing and developing blockchain technology products.
- I joined the company as a web developer specializing in creating crypto exchange interfaces. Products that I develop include landing pages, admin pages, trading platforms, blockchain products,... Here I developed my personal skills quite quickly .
- I have been using new technologies such as ReactJS, Next.js, Vue.js, Node.js, NestJS, Ionic, and many others to develop my company's products.
- Identifying and resolving problems discovered through consumer feedback and testing

TIKATIKA CONNECT CO., LTD

August 2021 to October 2021.

- Fixed bugs from existing websites and implemented enhancements that significantly improved web functionality and speed

Furthermore, I also undertook several freelance projects in the evenings to enhance my experience and develop various additional skills.

Relevant Skills

Programming Language

- Javascript, Typescript

I'm quite confident that I can catch up with other languages when needed very fast.

Web Front-end Technologies

- ReactJS, VueJS, NextJS, Ionic , Styled Components, Sass, HTML5, CSS3, Ant Design, Tailwindcss, ChakraUi

Web Back-end Technologies

- Protocols: REST, HTTP(S)
- Frameworks/Libraries: Node.js, Express.js, NestJs
- Databases: MongoDB, Firebase, MySQL
- Cloud Services: Vercel, Netlify, Raiwal, Render, Cloudinary

Dev Tools

- Git, Github, Gitlab, Jira, Figma, VS Code, Trello

Education History

Software Engineering

Industrial University of Ho Chi Minh City (2017 - 2021) majoring in Software Engineering.

Projects

PoolWallet

- Pools Wallet is a secure and easy-to-use cryptocurrency wallet that allows you to store, send, and receive various digital assets.
- Team size: 2
- I using ReactJS and EtherJS for the frontend and NestJS for the backend.
- Link: <https://play.google.com/store/apps/details?id=com.wallet.pools>

FriendifyAi

- Frienddify is a service that leverages AI to translate text, files, and generate images into multiple languages.
 - Team size : 5
- I have taken on the role of a Front-end Developer for the project, utilizing Next.js, Redux Toolkit, and Tailwind CSS.
- Link: <https://app.friendify.ai/welcome>

Tôi đi reviews

- My personal project was inspired by creating a platform where people can share their favorite places to eat, play, and relax in Ho Chi Minh City. Although the product is still in development, I feel it's my most satisfying creation that I've built with my own hands.
- I used Javascript, ReactJS, MongoDB, ExpressJs, ChakraUI to build the product.
